FIELDY: Feature List and Phase Plan

Field Workforce Management System | Product Planning Document

1. Overview

FIELDY is a Field Workforce Management System that lets a business manage employees, technicians and service teams on one platform, through a mobile app and a web admin dashboard.

Core idea: where the employee is, what work they are doing, which customer they visited, which task they completed, what the proof is, and how productive they are.

This document lists every planned feature, including four new feature groups (Insurance, Nearby Spare Parts Shop, Work Recognition, AI Integration), and splits them into three product phases.

2. Full Feature List

A. Core Features (29)

#	Feature	#	Feature
1	Mobile app	16	Employee documents
2	Web admin	17	Work/task management
3	GPS attendance	18	Customer management
4	Geofencing	19	Job/work orders
5	Live employee location	20	Photo proof
6	Route/history	21	Digital forms
7	Selfie attendance	22	Customer signature
8	Face recognition	23	Expense management
9	Offline mode	24	Sales/lead management
10	Multiple sites	25	Invoice/payment tracking
11	Shift scheduling	26	Route optimization
12	Leave management	27	WhatsApp integration

#	Feature	#	Feature
13	Overtime	28	API
14	Timesheets	29	Multi-company/account
15	Payroll export		

B. New Feature Groups

30. Insurance

- Insurance details store (ESI, PF, health/accident policy number, card upload)
- Emergency contact
- Accident / incident report (with photo and location)
- SOS emergency button (live location is sent to the admin)
- Claim request workflow (employee requests, HR approves, status tracking)
- Insurance partner integration (buy or renew cover from inside the app)

31. Nearby Spare Parts Shop

- Nearby shop finder (map, distance, call, directions)
- Parts used per job record
- Partner shop directory with stock check
- Order and pay for parts from the app, linked to the job

32. Work Recognition

- Points and badges (task completed, on-time arrival, good customer rating)
- Leaderboard (daily, weekly, monthly)
- Employee of the Month
- Appreciation messages from managers and customers
- Incentive / bonus calculation linked to payroll

33. AI Integration

- AI insights (best performer, delay prediction)
- Attendance anomaly detection (suspicious patterns, buddy punching)
- Auto-generated daily and weekly report summary
- AI assistant (a manager can ask "who was late this week?" and get an answer)
- Job suggestion (the right technician for the job and the parts likely needed)
- AI photo check (is the job photo clear and correct)
- Voice note to text (Tamil and English)

3. Phase-wise Split

Phase 1: FIELDY WORKFORCE (Basic)

Goal: employee attendance and basic management.

Feature	Notes
Mobile app	For employees
Web admin	For admins
GPS attendance	Core feature
Geofencing	Attendance only inside the site area
Selfie attendance	Proof of presence
Face recognition	Prevents attendance cheating
Offline mode	Works in low or no network areas
Multiple sites	Branch or site wise
Shift scheduling	
Leave management	
Overtime	
Timesheets	
Employee documents	ID and certificate upload
Insurance details store	Policy number and card upload (new)
Emergency contact	New

Phase 2: FIELDY FIELD (Medium)

Goal: field work, customers, safety and recognition.

Feature	Notes
Live employee location	Visible on a map
Route/history	Record of the route travelled
Work/task management	Assign and track

Feature	Notes
Customer management	Details and service history
Job/work orders	
Photo proof	Geo-tagged
Digital forms	Job sheet and checklist
Customer signature	Proof of job completion
Expense management	Travel and fuel claims
Payroll export	Attendance based
Accident / incident report	New
SOS emergency button	New
Claim request workflow	Request, approval, status (new)
Nearby spare parts shop finder	Map, call, directions (new)
Parts used per job	Basic tracking (new)
Recognition (basic)	Points, badges, leaderboard, Employee of the Month (new)

Phase 3: FIELDY PRO (Advanced)

Goal: complete business operations, automation and AI.

Feature	Notes
Sales/lead management	
Invoice/payment tracking	
Route optimization	Best route and auto-dispatch
WhatsApp integration	
API	Connect with other software
Multi-company/account	Also supports white-labeling
Insurance partner integration	Buy or renew cover in the app (new)
Partner shops: stock check, order, pay	New

Feature	Notes
Incentive payout	Recognition linked to payroll (new)
AI integration	Insights, anomaly detection, auto reports, AI assistant, job suggestion, photo check, voice to text (new)

4. Summary

Phase	Features	Focus
Phase 1: WORKFORCE	15	Attendance, shifts, leave, insurance details
Phase 2: FIELD	16	Field work, customers, safety, claims, nearby shops, recognition
Phase 3: PRO	10	Sales, billing, integrations, partners, AI

5. Differentiation

The new groups (Insurance with SOS, Nearby Spare Parts Shop, Work Recognition, AI) are FIELDY's main points of difference. In the public listings reviewed, none of the six competitors (Jibble, Zoho FSM, Truein, Emirates Compliance, OptifyServe, TrackoField) showed a built-in insurance or health claim feature. OptifyServe could not be found, so it is unverified. Confirm all competitor details directly with each vendor before using this as a sales claim.

6. Recommended Next Step

Build a Yes / No / Unknown comparison table of the 29 core features against the six competitors, verified from their websites or demos.
